MONTANA EMPLOYMENT AND LABOR FORCE

Quarterly Report

1st. Qtr. 1987

STATE OF MONTANA

TED SCHWINDEN, GOVERNOR

Department of Labor and Industry

M.M. "Peg" Hartman, Commissioner

All statistics for labor force employment, unemployment, and unemployment rates contained in this publication are in accordance with the federal guidelines as established by the Bureau of Labor Statistics. Methodology procedures use a household sample conducted in Montana on a monthly basis which is called the Current Population Survey. These official statistics are used to allocate Federal funds and to determine eligibility for federal assistance programs.

STATE OF MONTANA

HELENA, MONTANA 59624

P.O. Box 1728

Dear Reader:

The purpose of this publication is to report labor market information for the state of Montana. Economic conditions in Montana are highlighted in narrative form and in statistical tables.

Most of the information is obtained through surveys of the population and employers in federal-state cooperative programs. Other sources of information include administrative records, selected economic indicators, and nationally collected statistics.

I am sure this publication will be useful to you. Any suggestions or comments for improvements are always welcome.

Sincerely,

Bob Rafferty, Chief
Research & Analysis Bureau

GLOSSARY OF TERMS

1. Civilian Labor Force - the number of persons 16 years and older, defined as employed or unemployed, excluding members of the armed forces.
2. Employed - those persons who work for pay or profit during a week or, as unpaid family workers, work 15 hours or more during a week. Also included as employed are those who, although not working had some job attachment and were not looking for work, including persons temporarily absent from a job due to illness, bad weather, vacation, or labor dispute, whether or not they were in a pay status during their time off.
3. Unemployed - the number of persons who, for an entire week, did not work at all, were able to work and available for work, and (1) were looking for work or (2) would have looked for work except that (a) they were waiting to return to a job from which they had been laid off, or (b) they were waiting to report to a new wage and salary job scheduled to start within the following 30 days (and were not in school during the week).
4. Unemployment Rate - the number of unemployed expressed as a percent of the civilian labor force.
5. Residence Data - a count of people by where people live.
6. Establishment Data - a count of jobs by where people work.
7. Seasonally Adjusted Labor Force Series - to facilitate the evaluation of the labor force, recurrent yearly movements have been isolated and removed using the X-11 ARIMA method of seasonal adjustment. This is the same method used by the Bureau of Labor Statistics to seasonally adjust the national labor force series.
8. MSA - Metropolitan Statistical Area - as determined by the Office of Management and Budget. The MSA must have a central city with a population of 50,000 or more.
9. LFA - Labor Force Area as determined by the Research and Analysis Bureau, Montana Department of Labor and Industry, consists of a central city or cities with a population of less than 50,000 and the economically integrated geographical area surrounding it.
10. SDA - The Job Training Partnership Act (JTPA) was established to replace CETA in job search, placement, relocation, and especially training assistance. Each state designs local plans for JTPA programs through a Private Industry Council (PIC). Each PIC jurisdiction is known as Service Delivery Area (SDA). The two SDA's for Montana are known as Rural CEP (Beaverhead, Broadwater, Deer Lodge, Granite, Jefferson, Lewis & Clark, Madison, Meagher, Powell, and Silver Bow counties) and Balance of State (the other 46 counties).
11. BENCHMARKING - It is a continuous process of establishing a new set of data which affects the series of estimates through revisions. Once a new benchmark is established, the adjustments to estimates between the new benchmark and the preceding one are carried forward progressively to the current month by use of sample trends. The benchmark is established less frequently (usually once a year) based on sample or secondary data. In case of employment data, the benchmark is used to establish the level of employment, while the sample is primarily used to measure the month - to - month changes in the level.
12. CES-790 Program - current employment statistics survey produces monthly estimates of a wide variety of employment and earnings information for the nation and each state.

*** BENCHMARKING ***

This publication reflects the 1986 benchmarks for the Non-agricultural Wage and Salary Employment series and the Labor Force series. Annual tables reflecting this benchmark are included at the back of this publication.

What is benchmarking? A benchmark is a point of reference from which measurement can be made or upon which adjustments are based. The two series mentioned above will be addressed separately because of the differences in estimating each series.

Non-agricultural wage and salary employment is estimated from a carefully constructed sample survey of firms of varied size in each of the industrial classifications. As with any sample survey, unless all firms are sampled, there is bound to be some error. This limitation of any sample in representing the universe is the primary reason for benchmarking this series.

In periods of expansion employment levels tend to be underestimated, and in periods of decline these employment levels tend to be overestimated. The main reason for this over-and-under statement is due to new firm births and deaths respectively. Benchmarking will correct any errors in adjusting for new firms. Also, improvements in the quality of data and updating the industrial classifications of establishments are two more reasons this series is benchmarked each year. The benchmarking process for this series only examines the preceding two years of data.

The Labor Force series is benchmarked for different reasons than mentioned above. Labor force data is derived from a monthly sample of households conducted by the Bureau of Census for the U.S. Department of Labor. This is the Current Population Survey (CPS) and is designed to be statistically significant on a monthly basis for the nation. However, several states, including Montana, do not have a large enough sample to insure reliability on a monthly basis but is reliable on an annual basis. This is the main reason for benchmarking the Labor Force series in Montana.

The Labor Force series also includes the benchmarked non-agricultural wage and salary employment by industry in its benchmarking process. Revisions to the Labor Force series is normally limited to the preceding two years. Occasionally, an occurrence warrants the use of longer benchmarks. The 1980 Census was such an occurrence, and with the implementation of part of the data from the 1980 Census, benchmarking of the Labor Force series revised the previous nine years.

The above discussion is a simplified version of the benchmarking process. If a more detailed explanation is needed, please feel free to contact this office.

ECONOMIC HIGHLIGHTS AND UNEMPLOYMENT SITUATION
(In Thousands)

	Mar. 1987 <u>Prelim.</u>	Feb. 1987 <u>Revised</u>	Jan. 1987 <u>Revised</u>	Mar. 1986 <u>Revised</u>
Civilian				
Labor Force	405.9	401.9	399.5	400.6
Employment	370.2	362.8	359.0	361.1
Unemployment	35.7	39.1	40.5	39.5
Unemployment Rate	8.8%	9.7%	10.1%	9.8%

Economic Highlights and Employment Outlook:

STATEWIDE

Montana's unemployment rate for the first quarter of 1987 averaged 9.5%. This represents a decline of .4% over the first three months of calendar year 1986. Total average employment for the first quarter increased by approximately 8400 as compared with January through March 1986.

Major growth in non-agricultural payroll employment during the quarter was in the following three industries: manufacturing (durable goods), trade and services.

Although total mining was down from the previous year as a result of the decline in oil/gas extraction, metal mining became a strong gainer so far this year with an average increase of about 550 employees.

The service industry showed the largest increase in employment of about 1900, followed by trade, 985, and manufacturing with an

average of 500. Transportation, communication and public utilities reported an average decline in employment of about 600.

Over all, Montana's economy did show some improvement during the first three months of this year as compared with the same period in 1986.

A private for profit health care firm bought the Montana Youth Treatment Center in Billings. The new director plans to open with a staff of 110 to 115 people. The annual operating budget is projected to be \$3-4 million, compared with the \$2.2 million budgeted by the state for fiscal 1986.

Eastern Montana College announced that they will eliminate more jobs by June 1987 in response to the state Board of Regents' order to cut \$1.1 million from the school's budget. Seven jobs were eliminated prior to Dec. 31, 1986. It is estimated that more than 40 full time equivalent positions are to be eliminated.

Northern Montana College will drop 22 degree programs and 12 administrators. The president said that \$859,000 would be saved by the cuts.

Cuts of \$206,855 have been outlined for the Miles Community College. Five full-time and four part-time staff will lose their jobs under the expected loss of funding from the Montana Legislature.

A major fast food business has filed a Chapter 11 petition with federal bankruptcy officials seeking to reorganize without laying off any of its 450 employees or closing any of its 14 stores in three states.

In Lewistown the major wall board manufacturing plant that has been a mainstay of the local economy and a major employer for 60 years closed its doors in January. Company officials said that freight rates and long distances to major market areas caused their closing.

A firm in Belgrade has been awarded a \$74,000 contract to manufacture biological indicators. The company has about 40 employees.

Another company has secured a \$460,000 loan to update their facility to manufacture institutional furniture from particle board finished with a wood grain laminate. The plant will employ at least 19 full-time people.

As many as 500 homes in Montana are going through foreclosure proceedings. One agency estimated that it has cost them about \$6 million. It is estimated that 40 percent of the agency's home repossessions have been in Yellowstone County and other Eastern Montana counties. Problems in the agriculture and energy sectors are to blame, according to federal officials.

Although the weather was generally mild in the first three months of the new year Montana has seen an increase in the number of applicants for fuel assistance. In Eastern Montana, over 990 applications for assistance have been received compared with about 700 last year at this time.

Many in the oil industry had hoped that 1986 would be the end of four years of falling oil prices and idled drill rigs, but instead Middle East crude oil continued to flood American markets. The price of oil fell to \$15 a barrel - half of 1985's price and far below the \$40 of 1981. No relief is expected for 1987.

A major hotel in Billings has gone into foreclosure proceedings.

A local retail store in Sidney is expected to reopen soon. The store anticipates that it will hire between six and nine people.

The Montana Department of Commerce has submitted a \$442,000 grant application to the Federal Department of Commerce to open two Small Business Development Centers in Montana, one in Helena and the other on the campus of Dawson Community College in Glendive.

Fairview has lost one of its longtime businesses after more than 60 years of service to the community. The owners attribute the slowdown in the local economy as the reason for closing. Nine employees will be out of work due to the closure.

A new retail store opened in Billings Heights early in March. The new store manager said that about 300 people will be employed.

Highway construction west of Alzada will be starting this spring. Cost of the project is \$145,555.

Montana received a \$4 million federal grant from the Office of Surface Mining Reclamation and Enforcement which will be used to reclaim 80 abandoned mines within the state.

The future for a Cut Bank refinery and its 38 employees is in doubt if a major utility builds its own processing plant. The new \$3.5 million plant is scheduled for completion by September.

In Wheatland County, a major sawmill ended its logging operations. The owner of the firm said 16 employees were laid off and another 18 will be laid off in April when the planning quits. Peak employment at the mill was 50 workers. Financial problems ended the operation.

Eighty miners in Montana remained on strike near Colstrip in response to the expiration of the three year contract agreement. The miners are asking for a 3 1/2 percent pay raise, which includes medical, pension and pay benefits.

The Stillwater platinum-palladium project is well underway to boosting Montana's mining revenue. Currently, 180 people are employed at the mine. By late 1987, the figure will rise to 200. They are planning an expansion to their operation. The company is now mining and stockpiling ore and building a concentrator. The mine is not expected to sell its first ore until this fall.

The breakdown at the Colstrip 4 power plant in southeastern Montana may have cost the state millions of dollars in coal tax revenue, plus the shut down may cost additional millions as the power was sold to California. Eleven coal miners have been affected by the shut down.

In Missoula additional facilities are being constructed at a cost of \$15 million to house the manufacturer of a strong, thinner particle board. The expansion is expected to create 50 new jobs and the construction phase will employ about 100 people. Also, in Missoula a local meat packing firm has begun a \$1.5 million project to remodel, equip and expand existing facilities to nearly double their present operations. The expansion is expected to create 28 new jobs.

Construction of 15 new apartments in Missoula will cap a year of rapid growth in the city's stock of public housing. The 40 percent increase does not come close to the number of individuals who are on the waiting list for low-income housing. The new apartments cost about \$600,000 and were paid for with a grant

from the federal Department of Housing and Urban Development. According to a recent study the city could use an additional 2,500 units to meet the demand.

TABLE VII-A

UNEMPLOYMENT INSURANCE: CLAIMS TO PAYMENT

Many of those persons who become separated from their jobs enter our local Job Service offices for two reasons: to seek employment and to claim unemployment insurance (UI) benefits. Claimant wage credits obtained from insured employers are examined to determine if the claim meets monetary eligibility requirements for UI benefits and, if so, for how much per week is the claimant qualified. Monetarily eligible claims are subsequently segregated according to criteria for establishing which party (claimant or employer) was most responsible for the job separation in question. Claims for job separations resulting from claimant actions (issues) are further subjected to the test of whether or not an individual's reduction in his potential benefit duration is warranted. If otherwise eligible and if availability criteria continue to be complied with throughout his actual unemployment duration, weekly benefit payments will commence with the claimant's second week of unemployment (a waiting week must be served under Montana law). The number and amount of such payments by county are shown in the table on the following page. Interstate payments in the table refer to payments made to individuals who now reside in other states but who had established wage credits in Montana based employment. Amounts shown in the table are financed through employer taxes paid to the Montana UI Trust Fund Account.

Averages are based on gross earnings, including overtime and premium pay.

Selected Industries series began January 1950; Total Private Sector series began January 1969 (May 1972 issue).

Source: See technical note S-4 on final page. Revised to 1986 Benchmarks.

SOURCES OF DATA

- S-1. Prepared by the Montana Department of Labor & Industry, Research and Analysis Bureau, in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics (BLS). LAUS data (Local Area Unemployment Statistics program) are adjusted to the Current Population Survey benchmark and are the official BLS approved series that are used to allocate Federal funds and determine eligibility for Federal assistance programs. This series represents employment and unemployment by place of residence and are not comparable to the place-of-work industry employment series (CES data). Workers involved in labor disputes are counted as employed. Total employment in the labor force also includes agricultural workers, unpaid family workers, domestics, and self-employed.
- S-2. Prepared by the Montana Department of Labor and Industry, Research and Analysis Bureau. The unadjusted unemployment rate is prepared by the LAUS program in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics. The seasonally adjusted rate is an unofficial series and is provided only as an informational economic time-series.
- S-3. Prepared by the Montana Department of Labor and Industry, Research and Analysis Bureau from LAUS data. Data for Congressional Districts, Service Delivery Areas and Labor Force Areas are calculated from the official data series by summing up employment and unemployment for the appropriate counties involved and calculating an unemployment rate from the summed data for each area.
- S-4. Prepared by the Montana Department of Labor and Industry, Research and Analysis Bureau, in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics. Data from the CES (Current Employment Statistics) program represents employment by place-of-work and cover full-time and part-time employees who worked during or received pay for the payroll period that includes the 12th of the month. The data exclude the self-employed, volunteers, unpaid family workers, and domestic workers. Persons on sick leave, vacations, or holidays, and being paid for that period by their employer, are considered employed. Payroll and worker-hour data are collected for production and related workers in manufacturing industries, nonsupervisory workers in private service-producing industries, and construction workers in construction industries. The earnings figures are "gross" figures; that is, they reflect changes in wage rates, shift differentials, and premium pay for overtime work. The hours figures relate to the hours for which pay was received; this is different from scheduled or standard work hours.

- S-5. Tabulations produced by the U.S. Department of Labor, Bureau of Labor Statistics and reprinted by the Montana Department of Labor and Industry, Research and Analysis Bureau for informational purposes only. This is a national data series because Montana data is not available.
- S-6. Prepared by the Montana Department of Labor and Industry, Research and Analysis Bureau from Unemployment Insurance administrative records and is produced for informational purposes only.
- S-7. Prepared by the Montana Department of Labor and Industry, Unemployment Insurance Division to meet federal reporting requirements (ETA 5159, DE 230, and ETA 2112 Reports) and is reprinted by the Research and Analysis Bureau for informational purposes only.
- S-8. Prepared by the Montana Department of Labor and Industry, Unemployment Insurance Division and is reprinted by the Research and Analysis Bureau for informational purposes only. (DE 230 Report.)
